Coordinated Fire Management Plans bring together neighbouring landholders and Rural Fire Brigades in a bounded fire management area to develop an agreed risk reduction plan in the event of bushfire.

The main outcome of the first meeting on Oct 16, 2014 attended by 30 people was to embark on a process of workshops to develop such a plan. The second meeting of concerned/interested landholders on Nov 5, 2014 identified fire issues (at individual property and landscape level) and drew areas of concern on a map, highlighted possible fire mitigation areas and nominated members of a small working group to progress mapping and consultation with authorities.

This third public meeting will present a draft Co-ordinated Fire Management Plan for Ninderry developed by the small working group.

Public Meeting #3
Wed March 18th 2015
5-8pm
North Arm State School
Fairhill Rd, North Arm

Dr Greg Leach, Property Management Planning Co-ordinator for SEQ Catchments, has been working with private landholders to maximise the value of and minimise the risks to their properties for more than twenty-five years.
