| **English**   | Students will understand ...  
• how an author uses plot and setting to develop a character.  

Students will be able to ...  
• create a short explanatory text.  
• analyse the development of a main character. |

| **Maths**     | Students will understand ...  
• when to use appropriate computation strategies.  

Students will be able to ...  
• design and conduct a survey to investigate an issue.  
• select appropriate strategies for calculating (estimating, mental or written strategies). |

| **Science**   | Students will understand ...  
• that structured features and adaptations assist living things to survive in their environment.  

Students will be able to ...  
• design and create a creature with suitable adaptations to survive a given environment.  
• justify their choices for adaptations based on that environment. |
